Convenient ways to pay your bill

We have many convenient payment options. Here are just a few:

- If you're enjoying the ease and convenience of **eBill**, you can easily make a payment in our secure customer portal.
- If you're not signed up for **eBill**, you can still log into My Account to make your payment online.
- **AutoPay** is the secure, hassle-free way to ensure your bills are paid on time each month, automatically.
- **Mail your payment** to: Maine Natural Gas, P.O. Box 847100, Boston, MA 02284-7100

For more information about our convenient payment options, please visit mainenaturalgas.com/PayOptions.

Winter Protection ends April 15, 2025

The Maine Natural Gas Winter Protection program ensures that qualifying customers receive service through the cold-weather months. That protection ends April 15, 2025.

Customers with past-due accounts or payment concerns should call us before April 15, 2025 to make payment arrangements and learn about programs to reduce balances and prevent loss of service. Call us at **877.867.1642**.

Our courteous and helpful Customer Care Representatives are available 7:30 a.m. to 4 p.m. weekdays.

Don't dig into trouble, know what's below

Natural gas pipelines are usually underground. You rarely see them, but you should think about them if you're planning a project that requires excavation or digging. Here's what you need to know to work safely:

- Contact Dig Safe at least three full working days before excavation. Call **811** or visit digsafe.com. Utilities will visit your site to mark underground facilities. This free service, required by law, can prevent injuries and costly damages.
- Look for pipeline markers, which indicate the approximate location of a pipeline, the material transported, and the name and emergency number of the pipeline's operator.
- Hand-dig within 18 inches of any marked underground facility.

Remember:
It's free. It's easy.
And it's the law.

Spring forward for safety

When Daylight Saving Time began and you set your clocks ahead on March 9, did you remember to replace the batteries in your smoke and carbon monoxide (CO) detectors? Test them at least once a month.

You should have a smoke detector on every floor, in every bedroom and outside sleeping areas. Replace smoke alarms after 10 years.

Place CO detectors on every floor of your home, including the basement, within 10 feet of each bedroom and one near or over any attached garage. Replace CO detectors every 5-6 years.
